

SYED YASIR ALI

Computer Science Graduate | Data Analyst | SQL | PowerBI | Excel | MIS Executive | AI

Hyderabad, Telangana, India | +91 9949212099 | syedyaserali45@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Computer Science graduate with developing expertise in Data Analytics, MIS executive, Microsoft Excel, SQL, Power BI, Python, Artificial Intelligence, and technology-driven business solutions. Completed structured MIS Executive training through Tech Mahindra Foundation's SMART program in collaboration with K.C. Pullaiah Foundation, with practical learning in data management, advanced Excel, reporting, data analysis, dashboard creation, and business information systems.

Hands-on experience includes an HR Officer internship at Aashman Foundation, academic projects in Toxic Comment Classification and Artificial Intelligence Applications in K-12 Education, and practical analytics projects covering HR recruitment analytics, sales performance, SQL data cleaning, Excel, and Power BI. Additional professional development spans AI, EV technology, C programming, Data Science with Python, Full Stack Java, Front-End Development, CompTIA A+, Excel, ITIL 4, SQL, and cybersecurity.

Brings an entrepreneurial mindset through independent exploration of hospitality, consumer products, digital community platforms, beverage concepts, and customer-focused business models. Interested in roles where technical learning, analytical thinking, and commercial awareness can support better decisions and operational outcomes.

Additionally, possess practical skills in frontend development using HTML and CSS, graphic design and photo editing using Adobe Photoshop, video editing, and YouTube content creation. Interested in combining technical, creative, and business-oriented skills to develop engaging digital solutions.

CORE SKILLS

ANALYTICS: SQL, Microsoft Excel, Advanced Excel, Power BI, Python, Data Cleaning, Data Visualization, MIS Reporting

BUSINESS: Business Analysis, Business Reporting, Operational Reporting, Research, Customer-Centric Thinking, Problem Solving

TECHNOLOGY: Artificial Intelligence Fundamentals, C Programming, Java / Full Stack Fundamentals, Cybersecurity Fundamentals, IT Support Fundamentals

WEB DEVELOPMENT: HTML5, CSS3, Frontend Web Development, Web Design

CREATIVE & DIGITAL MEDIA: Adobe Photoshop, Photo Editing, Video Editing, Content Creation, Thumbnail Design, Digital Content Creation

PROFESSIONAL TRAINING

Tech Mahindra Foundation - SMART | MIS Executive Training Program

Completed structured training focused on MIS operations, data management, advanced Excel, financial and operational reporting, data analysis, dashboard creation, and business information systems.

- Data Management & Processing; Advanced Excel; Financial & Operational Reporting; Data Analysis; Dashboard Creation; Business Information Systems.

GTT Foundation & Green Ways | Electric Vehicle Training Program

Completed training covering EV technology fundamentals, electric mobility, clean transportation, and future mobility concepts.

PROFESSIONAL & INTERNSHIP EXPERIENCE

Tech Mahindra Foundation - SMART | MIS Executive Training

- Built practical capability in data management, advanced Excel, reporting, data analysis, dashboard creation, and business information systems.
- Strengthened ability to organize operational information into structured management reports and dashboards.
- Developed an understanding of how MIS reporting can support business visibility and data-driven decisions.

Aashman Foundation | HR Officer Intern |

- Completed an HR-focused internship with exposure to workplace coordination, communication, organizational activities, and HR responsibilities.
- Worked alongside co-interns, team leaders, heads, and organizational stakeholders in a structured team environment.
- Developed professional communication, collaboration, coordination, and workplace discipline.

- Received certification recognizing the completed internship and demonstrated HR-related abilities and skills.

DATA ANALYTICS PROJECTS

HR Recruitment Analytics Dashboard | Microsoft Excel | Power BI

- Developed a recruitment analytics dashboard to organize and visualize the hiring pipeline.
- Analyzed candidate applications, shortlisting, interviews, selections, and rejections.
- Used Excel for data organization and analysis and Power BI for dashboard creation and visualization.
- Converted recruitment information into management-friendly reporting to support understanding of pipeline activity.

Sales Performance Dashboard | Microsoft Excel | Power BI

- Created a sales-performance dashboard to present business results in a clear, structured format.
- Analyzed sales trends and product/business performance using Excel-based data preparation and reporting.
- Used Power BI to visualize KPIs and business trends and make raw information easier to interpret.
- Demonstrated ability to transform transaction-level information into useful business insights without inventing results or metrics.

SQL Data Cleaning & Analysis | SQL

- Worked with structured datasets and practiced data cleaning and analytical SQL workflows.
- Identified duplicate or inconsistent records and worked with missing-data scenarios.
- Applied SELECT, WHERE, GROUP BY, ORDER BY, aggregate functions, filtering, and basic data manipulation.
- Extracted structured information from raw datasets for analytical use.

WEB DEVELOPMENT PROJECTS

GYM Website | HTML5 | CSS3

- Developed a frontend gym website using HTML and CSS.
- Designed and structured web pages to present gym services and information.
- Applied CSS styling to improve website layout and visual presentation.
- Practiced frontend development, webpage structure, and user interface design.

Grocery Shop Website | HTML5 | CSS3

- Developed a frontend grocery shop website using HTML and CSS.
- Designed webpage layouts to showcase grocery products and shop information.
- Applied CSS styling for organized content presentation and visual consistency.
- Gained practical experience in building website interfaces using HTML and CSS.

ACADEMIC PROJECTS

Toxic Comment Classification | College project

- Explored an AI/data-driven approach to identifying and classifying potentially toxic online comments.
- Applied practical problem-solving thinking to a real-world content-moderation use case.
- Built exposure to AI concepts, text/data classification, and technology-based analysis.

Artificial Intelligence Applications in K-12 Education | College project

- Explored practical applications of Artificial Intelligence in K-12 education.
- Examined technology-assisted learning and opportunities for intelligent systems in education.
- Demonstrated interdisciplinary interest in applying emerging technology to real-world domains.

AI LEARNING HIGHLIGHTS

The AI Masterclass 3.0

Completed the AI Masterclass and developed learning exposure across AI fundamentals, real-world problem solving, productivity, business applications, future innovation, and practical AI tools. The course strengthened an already active interest in applying technology beyond theory.

INDEPENDENT VENTURE & PRODUCT PROJECTS

These entries represent independent entrepreneurial exploration and product concepts developed through research, ideation, business-model thinking, and solution design. They are intentionally separated from formal employment and are not presented as launched commercial businesses unless independently verified.

Mehfil Experiences | Founder / Independent Venture Concept

Concept: "Curated Stays. Private Events. Exclusive Supper Clubs." A hospitality and experiences platform concept combining accommodation discovery, private events, catering, transportation, event management, and curated supper-club experiences.

- Developed a supper-club proposition based on curated date/time, venue, menu, fixed price, limited seats, and pass-based access.
- Explored customer experience, platform structure, event operations, monetization, market positioning, and investor-pitch thinking.
- Focused on creating a more curated alternative to fragmented discovery and booking experiences.

Beverages | Independent Consumer Product / Beverage Concept

Developed an RTD beverage concept aimed at a modern Indian consumer brand with future international potential.

- Explored fennel-based beverage formulations and a broader hydration-focused product category.

- Worked through flavors development, natural-ingredient positioning, affordable Indian-market pricing, packaging, and Gen-Z brand positioning.
- Considered product-line expansion, brand identity, customer use cases, and long-term category development.

Community & Gated-Community Digital Platform | Independent Product Concept

Designed a technology concept to replace fragmented WhatsApp-based communication within colonies, apartment communities, and gated communities.

- Proposed verified resident accounts, house-number identity, OTP authentication, house transfer, multi-home switching, and community-level privacy.
- Proposed complaint management with photographs, verified plumbers/electricians, local business information, infrastructure updates, and community contacts.
- Explored potential government-service integration, advertising revenue, and verified-service-provider monetization.
- Demonstrated product thinking across user journeys, verification, privacy, community management, and monetization.

CREATIVE & COMMERCIAL PROJECT EXPERIENCE

Hospitality & Food Marketing Content | Independent creative / commercial assignments

- Fine-dining restaurant promotional video concept designed for a 1080 x 1920 social-media format.
- Pub promotional poster concept incorporating event and weekend promotional messaging.
- Burger restaurant promotional standee concept developed around offers, ingredients, menu messaging, and customer-facing communication.
- Built exposure to hospitality marketing, promotional communication, visual content requirements, and commercial positioning.

Content Creator | Personal YouTube Channel

- Created and edited video content
- Managed video editing and content preparation.
- Designed or prepared visual assets such as thumbnails.
- Developed experience in content planning, video production, and digital publishing.
- Worked on improving presentation and audience engagement.

BUSINESS & PRODUCT EXPLORATION

Additional independent exploration has covered consumer food and beverage ideas, hospitality and cloud-kitchen models, healthy snack products, local food-service concepts, mobile service businesses, travel and hospitality services, property and real-estate analysis, digital community products, consumer packaging, and subscription-style business models.

ENTREPRENEURIAL STRENGTHS

- Opportunity identification
- Customer problem discovery
- Business-model thinking
- Product ideation
- Market research
- Pricing and positioning exploration
- User journey thinking
- Monetization exploration
- Brand and customer experience thinking

EDUCATION

Shadan College of Engineering and Technology | B.Tech Computer Science | Hyderabad, Telangana, India

Iqbalia Junior College | MPC | Hyderabad, Telangana, India

International Indian School Jeddah | Xth - CBSE | Jeddah, Saudi Arabia

PROFESSIONAL STRENGTHS

Analytical thinking | Structured problem solving | Business-oriented technology thinking | Self-directed learning | Technology curiosity | Continuous learning | Entrepreneurial mindset | Communication | Team collaboration | Research and documentation | Product ideation | Customer-focused thinking | Adaptability | Creative Problem Solving | Content Planning | Attention to Detail | Self-Learning | Quick-Learner

CAREER POSITIONING

Core Value Proposition

Computer Science graduate combining technical foundations, practical data-analytics training, MIS capability, AI awareness, and entrepreneurial business thinking.

Professional direction

Interested in using data and technology not only to produce reports, but to understand business problems, identify patterns, improve processes, and support better decisions.
